Development of Technology Education in New Zealand Schools, 1985–2008

Don Ferguson

This talk begins with the development of Technology Education in New Zealand schools, 1985–2008. It starts by identifying aspects of teacher professional development, which is crucial in shaping the curriculum and pedagogy. The discussion then moves to the changing environment for technology education, considering the role of technology in the broader context of education in New Zealand. The talk also highlights recent findings on the refocusing of technology education in New Zealand schools, 1985–2008, and discusses the role of technology in aiding education in the New Zealand primary classroom. The talk concludes with the future direction of technology education in New Zealand schools, 1985–2008, emphasizing the importance of ongoing professional development for technology teachers in a New Zealand context.
As the first country to give women the right to vote in 1893, New Zealand should they fall pregnant, with disruption of education and career development being a commonly cited.
