my Pearson Training: Investigations in Number, Data, and Space. Investigations in Numbers, Data, and Space is a K–5 mathematics curriculum, developed at TERC in Cambridge, Massachusetts, USA. The curriculum is often referred to as "Investigations in Number, Data and Space." The curriculum is designed to help students understand the Common Core State Standards in mathematics. It is a comprehensive program that includes investigations, problem-solving activities, and assessments. The curriculum is used in many schools across the United States, and it is known for its inquiry-based approach to teaching mathematics. The curriculum is designed to help students develop a deep understanding of mathematical concepts and their real-world applications. It is important to note that the curriculum is not without controversy, and some educators have expressed concern about its effectiveness and alignment with the Common Core State Standards. However, overall, the Investigations curriculum is widely regarded as a high-quality program that helps students develop the skills and knowledge they need to succeed in mathematics.
